

Trolley is a versatile and essential tool in a variety of industries. The best type of trolley for a particular application will depend on a number of factors, including the load capacity required, the distance the trolley will be used to travel, the type of environment in which it will be used. CARMAC TECHNOLOGIES PVT. LTD. manufactures manual and battery-operated caster and rail based customized Trolleys.

### RAIL BASED BATTERY OPERATED TROLLEY

#### Special Features :

- Battery-operated. (Electric operated - Optional)
- Safe, reliable, easy to use and more efficient.
- Environmentally friendly.
- Cost-effective.
- Speed Control.
- Automatic braking.
- Available in Rail and Floor mounted version.
- Steering assistance.
- **Capacity : 1T to 50T (Electric operated upto 30T).**

Our Rail-based battery-operated trolleys are a type of trolleys which are powered by a battery. This means that they do not require any manual effort to move, which makes them ideal for use in applications where heavy loads need to be transported over long distances, or where the operator may not be able to exert a lot of force.

### CASTOR BASED MANUAL TROLLEY

#### Special Features :

- Easy to use and maneuver
- Platform or deck for holding materials.
- Variety of sizes & capacities to suit different needs.
- Durable and lightweight construction.
- Cost-effective solution for material handling.
- **Capacity : 2T to 50T.**

#### Application :

- Manufacturing.
- Warehousing.
- Transportation.
- Construction.

We manufacture Castor based manual trolleys which are the most common type of trolleys, and are used in a wide variety of industries, including manufacturing, warehousing, Transportation and Construction. They are easy to use, and can be used to transport a variety of materials, including boxes, totes, and machinery.

### RAIL BASED MANUAL TROLLEY

#### Special Features :

- Smooth and efficient movement along the rail.
- Platform or deck for holding materials.
- Variety of sizes & capacities to suit different needs.
- Durable and lightweight construction.
- Cost-effective solution for material handling.
- **Capacity : 2T to 50T.**

#### Application :

- Manufacturing.
- Warehousing.

Our Rail based manual trolleys are designed to run on a rail system, making them ideal for use in applications where heavy loads need to be transported over long distances, such as in factories and warehouses.

We design, manufacture, supply and commission a wide range of Welding Manipulators like Welding Rotators, Column & Booms, Positioners along with Material Handling Equipments like Battery/Electric Operated Trolleys, Scissor Lift Tables, Coil Upender & Turnover Devices.

**OUR PRODUCT RANGE**

Welding Rotators

Welding Positioners

Scissor Lift Tables

Head and Tail Stock  
Welding Manipulators

Welding  
Columns and Booms

Load Overturning  
Devices

Manual & Battery Operated  
Material Handling Trolleys

Electric & Hydraulic  
Upenders & Tilters

Battery Operated  
Pedestrian Cart

Wire Feeder  
Balancer Booms

**PEDESTRIAN TUGS**

Smart Mover Series

Master Tug Series

All Terrain Series

Power Steer Series
